

LEGIFORM

LEGAL RESEARCH

1. COMPANY OVERVIEW

Legiform bridges the gap between law and innovation — enabling legal aid organizations to harness digital tools and AI to serve marginalized communities more effectively.

2. CHALLENGES FACED

Legal aid organizations spend countless hours searching for precedents, statutes, and case law — time that could be spent advocating for clients.

Outdated research tools, limited funding, and fragmented databases make legal analysis slow, inconsistent, and inaccessible for under-resourced teams.

- Legal professionals face information overload from expanding case law and policy changes.
- Manual research slows case preparation and limits client capacity.
- Smaller organizations lack access to advanced databases or legal tech.

3. SOLUTION: LEGIFORM LEGAL RESEARCH AUTOMATION

1. Intelligent Search Quickly locate relevant cases, statutes, and opinions using AI-driven semantic search — not just keywords.

2. Automated Summaries Instantly generate concise case briefs and statute explanations to support client arguments and filings.

3. Contextual Insights Identify key patterns, precedents, and jurisdictional trends to strengthen strategy and reduce research time.

4. Collaborative Research Hub Centralize findings, notes, and sources so entire teams can work seamlessly — anywhere, anytime.

4. KEY BENEFITS

After implementing these solutions, Legiform customers are expected to achieve several key results:

- Faster Analysis: Cut research time by up to 70%.
- Greater Accuracy: Eliminate missed precedents with intelligent cross-referencing.
- Enhanced Access: Bring advanced research tools to community-based legal clinics.
- Smarter Strategy: Empower attorneys with AI-generated insights and summaries.

5. CONCLUSION

With Legiform, legal professionals gain more than just speed — they gain clarity, confidence, and capacity to serve. By modernizing legal research, we're not just improving workflows; we're reshaping access to justice for the communities that need it most.

6. CALL TO ACTION

Collaborate with Legiform to scale automation and transform access to justice.
