

Legiform builds a bridge between legal innovation and real-world impact through three pillars:

- Legiform Podcast
- Training & Webinars
- Technology Prototype

SOLUTION

Intelligent Case Intake

Automatically route client requests by urgency and type to prevent missed cases.

Workflow Automation

Monitor cases from intake to resolution with instant alerts and updates.

Data-Driven Insights

Identify client trends and outcomes through dashboards for smarter decisions.

Smart Document Management

Use AI to draft and organize legal documents in minutes.

OUTCOMES

Faster Service Delivery

Reduce administrative bottlenecks

Increased Access

Handle higher case volumes with the same resources

Reduced Errors

Automated checks ensure accuracy and compliance

Sustainable Growth

Build capacity to scale services across regions

CHALLENGE

Legal aid organizations face an overwhelming caseload with limited staff and minimal technology support.

Manual case handling, intake processing, and document review consume valuable time — leaving less capacity for what truly matters: serving clients.

- 92% of legal problems faced by low-income Americans receive no or insufficient legal help
- Many legal aid teams still rely on outdated or paper-based processes
- Staff burnout and inefficiency reduce the quality and reach of legal support
- Lack of technical funding prevents modernization and scaling

COMPANY CASE STUDY

By bridging law and technology, Legiform enables every legal aid organization — regardless of size or budget — to harness automation as a force for equity.

LEGIFORM

"Automation doesn't replace compassion — it amplifies impact" - **Aayushi Saxena**, Founder Legiform
